

## *Productive in the front office*

SEIKO Precision FB-400

**A flatbed printer for easy form printing.**

**With automatic paper alignment and margin recognition for extra convenience.**

### FB-400

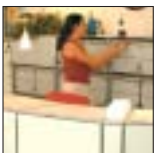

The **FB-400** is the **perfect multi-form printer** for invoices, receipts and ID cards, as well as for standard A4 paper.

This printer is already regarded highly by doctor's practices, banks, authorities and many other service-oriented corporate sectors. Its extremely practical paper handling does away with misprints, thus boosting your productivity, economy and efficiency. And its ability to print on media up to 1.6 mm thick makes it particularly attractive for use with savings books, passports, service booklets, etc. Its compact design and unusually small surface area make the **FB-400** the perfect solution for cramped office spaces.

### FB-400 key features

- Printing method: 24-pin dot matrix printer (flatbed)
- Printing speed: 480 cps at 12 cpi (draft), 133 cps at 10 cpi (LQ)
- Paper feed: individual front sheet feed and output
- Cut sheet format: 70-240 mm wide, 68.6-711.2 mm long
- Print media: prescriptions, transfers, cheques, courier letters, invoices, savings books, passports, etc.
- Multiple sets: original plus 5 copies

The ideal printer for:

Counter and reception areas

Passports, savings books and service booklets

Doctor's certificates and prescriptions

Transfer slips and courier letters

## INFORMATION

### User-friendliness in direct customer relations

The FB-400 from SEIKO Precision is the flexible, powerful and extra user-friendly dot matrix printer for the service sector. It can print onto a range of media such as standard A4 paper, sets of invoices, cheques, tickets, bank statements and savings books, and is suitable for a wide array of business sectors (incl. banking and insurance, doctor's practices, travel agencies and production works).

The innovative automatic paper alignment feature ensures that the printing results are perfect even when the paper is fed in untidily, making the whole paper handling process simple, quick and flawless. In addition, the FB-400 also has an automatic printhead distance measurer which is able to identify immediately the thickness of the print media (original + 5 copies; up to 1.6 mm) and adjust the position of the printhead accordingly.

### The FB-400 stands for the utmost in economic efficiency

Exceptional speed, a long life and a favourable price are the attributes of the FB-400 which make it an indispensable printer for counter and reception areas. It can print an incredible 480 cps (at 12 cpi in a standard font!). The life of the printhead at 400 million characters and of the ribbon at 4 million characters result in such an economical price per page that this printer is virtually second to none amongst similar printers on the market.
